Programming & Record/Playback Features

Hi-Fi Stereo Sound with Built-In MTS/SAP Decoder

Record stereo videotapes from stereo sound sources and playback pre-recorded hi-fi stereo tapes in hi-fi stereo sound—with an excellent 90dB+ dynamic range—through a stereo-equipped TV or regular TV and stereo hi-fi home audio system. The built-in MTS/SAP decoder allows reception and recording of off-air television stereo broadcasts and second audio program transmissions, where available. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

VCR Plus+™ Programming

Simplifies VCR programming by allowing you to simply enter PlusCode® programming numbers found in many published television listings. When recording begins, your VCR automatically selects the proper TV channel and program length. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

One-Touch Record

8-Event/1-Year Smart Programming

Remote Control Onscreen Menu Programming

Picture

SQPB (S-VHS Quasi-Playback)

A revolutionary video playback technology that allows you to watch videotapes recorded in the S-VHS (Super-VHS) mode. Now you too can enjoy the videos that your Uncle made at the last family reunion without buying expensive S-VHS equipment.

Incredible Picture™

For picture detail that's so real, you'll think you're a member of the cast! The menu-selectable Incredible Picture settings boost picture detail beyond average, all the way to incredible! Choose from NORMAL, VIDEO ENHANCER, or INCREDIBLE PICTURE modes.

Video Stabilizer

For those problem SLP recordings that just won't stop jittering. Activation of the Video Stabilizer circuit generates an artificial vertical reference that improves the vertical lock and greatly reduces bounce.

4-Head, Double Azimuth Design

Combines direct drive cylinder and capstan motors with precision digital servo control to produce excellent special effects reproduction in Still and Slow modes in both SP and SLP speeds.

19 Micron Head

Digital Auto Tracking System

Auto Head Cleaner

Convenience

SmartClock™

This menu-driven feature automatically maintains the correct time, regularly checking and updating the time if necessary. It also resets the clock after a power failure. The menu-driven time zone feature allows selection of appropriate time for those who live in a time zone other than that of their CATV service provider.

Automatic Channel Setup

The VCR tuner scans through television frequencies, automatically storing active broadcast channel into memory. Then, only active channels programmed into memory are tuned using the CHANNEL ▲ ▼ buttons on either the remote or front panel of the VCR. Automatic channel preset can be repeated whenever desired, should new channels become available. Channels can be manually added or deleted.

* SmartClock and Incredible Picture are trademarks of Philips Consumer Electronics Co. VCR Plus+ and PlusCode are trademarks of Gemstar Development Corp. The VCR Plus+ system is manufactured under license from Gemstar Development Corp.

The EPA ENERGY STAR emblem does not represent EPA endorsement of any product or service.

Front Panel Audio/Video Inputs

Provide added convenience to the user when recording tapes directly from a camcorder to the VCR. In addition, accessory video equipment such as a video game or Web browser can be connected for direct playthrough to the TV set.

181-Channel FS Tuning

The digital quartz tuner can receive up to 181 channels, including UHF, VHF, and 113 cable channels, without the inconvenience and expense of a cable company decoder/converter (on non-scrambled cable systems). Channel tuning is by random access with the remote control transmitter or scan tuning up and down by remote or at the set.

Clock/Function Display

Continuously alerts you to all important recording and playback conditions, correct time, counter position, tape speed, channel number, etc. When the VCR is turned off, the time display automatically dims to make it less distracting.

Trilingual (English/Spanish/French) Onscreen Display

Indicates record/playback functions, channel number, clock setting, date, counter, programming, one-touch record and record standby, keeping you alert to the status of all features in a heads-up onscreen display in your choice of English, Spanish, or French.

Onscreen Real-Time Counter

Timer/Programmer Back-up System

Repeat Play

Quick Start Mechanism

Audio/Video Input/Output Jacks

Special Effects

21x Forward/Reverse Latching Search

Search in forward or reverse mode at 21 times normal playing speed in SLP, and 7 times normal in SP. The Latching Search feature provides continuous forward or reverse search with a single touch of the control. A second touch stops the search operation and returns the unit to the Play mode.

Remote Control

VCR/Universal TV/CBL Remote

Multifunction infrared remote controls all operating features and functions of this VCR, plus select functions of most Philips Magnavox and some competitive brand television sets, as well as some cable converter/decoders. Change channels fast with the numeric direct access keypad and heads-up onscreen display for confirmation.

Full Auto-Feature Package

- Power On
- Digital Auto Tracking
- Auto Play
- Auto Repeat
- Auto Rewind
- Auto Eject
- Auto Power Off
